Access

WESROC.NET AN ANOVA SOLUTION

5. Fill in the Tank Information:

- Location Name
- Tank Capacity
- Tank Scale
- Fuel Type
- Branch

6. Scroll down to find “Location Information”. Enter the details of the tank’s location. If you want to add extra information, use the “Custom Fields” section at the bottom. When done, tap the right arrow at the bottom of the screen.

9. To customize which alerts each person receives, go to “Email Alerts” and enable the relevant options.

When finished, tap the right arrow at the bottom.

> **Note:** This setup is for R3D only. You do not need to enter tank dimensions, open air reading, or sensor offset.

10. The next screen shows the communication frequency. This can’t be changed in the app, only on the website. Tap the right arrow when done.

11. To complete the installation, you can add a photo of the tank. You can either take a new photo or choose one from your gallery.

12. Once the installation is complete, the screen will show “Configuration Complete” along with the latest readings.
